2017 Chicago Auto Show
Dodge Challenger Simulator – Fast Facts

CHALLENGER SIMULATOR

The Dodge brand will put a huge grin on the faces of Chicago Auto Show attendees as they showcase a fun and interactive full motion Challenger simulator. The Dodge Challenger vehicle is outfitted to move the driver inside the car to match the action displayed on the monitor outside of the car. The vehicle moves up and down as it goes over elevations, vibrates accordingly to engine vibration, moves forward and back with acceleration and braking, and moves left and right depending on the lean of the vehicle in the game. It is a real-life behind-the-wheel experience without ever leaving the auto show floor.

The Dodge Challenger Simulator will be open to the public during the 2017 Chicago Auto Show from Saturday, February 11 – Monday, February, 20.
