

Lucid Gravity and Lucid Air Highlights of 2026 Chicago Auto Show

The Lucid Gravity Touring, the entry point to the Lucid Gravity line-up, as well as the multi-award-winning Lucid Air will be highlights of this year's Chicago Auto Show. The Lucid Air one display will not be a new car but will be representative of **Lucid Recharged™**, the company's first certified pre-owned vehicle program which offers car shoppers a new way to get behind the wheel of the world's most advanced electric vehicles.

Not only will show attendees get to see these groundbreaking electric vehicles on display but they can also experience them on the indoor EV test track.

Lucid Gravity redefines the SUV category with a clean-sheet design enabled by Lucid's proprietary EV technology. Lucid Gravity offers the practicality of a full-size SUV within the footprint of a mid-size, seating up to seven adults and delivering game-changing versatility. Lucid Gravity Touring features Lucid's high-efficiency battery and powertrain architecture, advanced vehicle dynamics, and native NACS port for convenient ultra-fast charging.

With a starting price of \$79,900, the Lucid Gravity Touring delivers up to 337 miles of EPA range and can charge to 200 miles of range in as little as 15 minutes.

The Lucid Air sedan, one of the industry's most awarded electric vehicles in recent years, continues to set new standards for the EV experience. The Lucid Air Pure, with a starting price of \$69,900, is the industry's most efficient electric vehicle. Models of the Lucid Air were the first to achieve an EPA-certified range of more than 500 miles on a single charge. At 512 miles, the Lucid Air Grand Touring remains the only EV certified for more than 500 miles of official EPA range.

All Lucid Airs equipped with DreamDrive Pro, Lucid's state-of-the-art Advanced Driver Assistance Systems, now enjoy the benefits of Hands-free DriveAssist and Hands-free Lane Change Assist.

All Lucid Airs, regardless of model year, now have access to the Tesla Supercharger network, the most available and convenient charging network in the US and Canada, with an available adapter. Unlike the Lucid Gravity, with its native NACS charge port and high-tech boost charging capabilities, Lucid Air uses a NACS adapter available from Lucid to plug into compatible Tesla Superchargers (V3 and above).

Lucid Recharged™, the company's first certified pre-owned vehicle program, begins with single-owner vehicles that have fewer than 62,000 miles. Every vehicle undergoes a thorough 160+ point inspection to ensure the highest quality and reliability standards, and then receives mechanical and cosmetic reconditioning, as needed, using only Lucid-approved parts. Customers will also have the option to upgrade certain Lucid Recharged vehicles with additional features, such as the DreamDrive® Pro advanced driver assistance system.

All Lucid Recharged certified pre-owned vehicles come with the balance of the original 4-year/50,000-mile factory warranty plus an additional 12-month/12,000-mile manufacturer limited warranty, roadside assistance for the full warranty period, a verified clean title & service history, CARFAX® report, and inspection report.

For more information about the Lucid Recharged program and to search available certified pre-owned inventory, customers can visit <https://lucidmotors.com/pre-owned>.

If you would like to check out the either the Lucid Gravity Touring or the Lucid Air, or would like to learn more about Lucid Recharged certified pre-owned program, reach out to Dave Buchko at davebuchko@lucidmotors.com
